

Dear Parents/Guardians,

16th March, 2022

Croucher Science Week 2022 Activity

For students to experience the fun of science during the holiday, the school participated in the “Croucher Science Week 2022” online activity.

The Croucher Science Week is jointly organized by the Croucher Foundation, the Education Bureau and the Hong Kong Science Museum. The organization invited outstanding science teams from all around the world to participate in the production of the program, hoping to provide students with more opportunities to experience science through a series of science videos and programs, so as to promote a close connection between students and science.

From 23rd March to 22nd April, students and parents will be able to watch public and school-specific events through the Croucher Science Week school platform. Video programs include fun science activities, science theatre and unique animal introductions. Most programs are broadcasted in English but will be supplemented with Chinese and English subtitles. Parents are encouraged to watch them with their children. The programs are available on demand and free of charge.

The activity platform requires the following username and password to login.

School Activity Platform:	https://croucherscienceweek.hk/school-event-2022/	
Account:	CSW2022	
Password:	school2022	

Note: Parents and students can login to the website to have a brief understanding of the program and watch it during the science week. Also, please do not share the link and login information with the public or non-schools as the platform is only open to schools that have successfully registered.

Yours faithfully,
Mr. Chan Chun Wah
Principal
